DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks (page 10, last paragraph and page 11, second paragraph), filed 1/24/2005, with respect to claims 1-29 and 55 have been fully considered and are persuasive. The rejection of claims 1-29 and 55 has been withdrawn.

2. Claims 1-55 are allowed.

3. The following is an examiner's statement of reasons for allowance:

* Claims 1 and 55 have been amended to overcome the rejection under 35 U.S.C. § 112, second paragraph;

* The present invention provides a new method and computer product for determining an optimal compression for reducing the size of an electronic file or document having at least one embedded or linked image, which is capable of tailoring image resolution to particular output devices and of discarding non-essential data (specification, page 4, first paragraph), and can prevent cumulative degradation of images through repeated lossy compression (specification, page 5, first paragraph).

In particular, the prior art, either taken singly or in combination, does not teach:

- determining resolution characteristics of an output destination of the electronic file; automatically setting a resolution of each image based on the output destination of the electronic file (see independent claim 1);

- discarding unnecessary data associated with each associated image; and determining an optimal compression method for each associated image based on the characteristics of each associated image (see independent claim 30);

- automatically setting a resolution of each image based on the output destination of the electronic file; discarding unnecessary data associated with each embedded image (see independent claim 46).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
